

PREVENTIVE MAINTENANCE

The extra layer of support to keep your mission-critical equipment running nonstop

Printronix **Preventive Maintenance** is our support solution to keep your printers working at maximum productivity with top print quality. Performing a **Preventive Maintenance** check with one of our Printronix Certified Technicians will streamline your business operations and help you reduce your overall expenses.

- » Save money by preventing printer and parts failure
- » Avoid unexpected breakdowns and costly downtimes
- » Extend the lifespan of the equipment
- » Assure optimal working conditions and print quality

\$299
Per Printer*

What does Preventive Maintenance include?

Deep Cleaning

Thorough cleaning – both inside and outside of your printer – to eliminate residue, contaminants, paper particles, dust and dirt. Proper lubrication and calibration after cleaning.

Inspection

Systematic inspection of equipment includes examining mechanical and electrical connections to check proper functioning of key print mechanisms such as shuttles, printheads and other crucial components. Print quality will be tested and minor adjustments will be made according to the **Preventive Maintenance** guidelines.

Preventive Maintenance Reporting

A concise maintenance report detailing your printer's condition will be provided along with any recommended repairs or potential need for replacement. Your Printronix Certified Technician will guide you through the next steps to optimize your printer's operations and provide a solution that fits your budget.
